

Patient's name: _____

Social insurance number: _____

HygieneSling is easy to apply and facilitates dressing/undressing of the patient in connection with visits to the toilet. It features leg sections, which means that the patient does not sit on the sling. Instead, the sling provides support from the tailbone up over the head and under the legs. HygieneSling is designed for most lifting situations that involve dressing and undressing of the patient. HygieneSling is available in three models: without belt, with belt and a model with a belt and extra back support.

Functional inspection

Visual and mechanical inspection

Check the condition and function of the sling regularly. Always inspect the product after laundering. Check to ensure that seams and material are free from damage. Check to ensure that fabric is not worn or faded. Apply load to the device and check to ensure that clasps, handles, etc. withstand heavy load. If there are signs of wear, the product must be discarded.
